

Keller minimal windows® **curve**

Exclusive style element for interior and exterior architecture

The elegance of Keller minimal windows® **curve** makes new forms possible in architecture and underlines the fascinating look of modern buildings and living rooms. The combination of straight and curved minimal windows® fixed and sliding windows creates an unusual design and provides one's individual creative freedom with a great many aesthetic possibilities, all with the same high functionality.

Keller minimal windows® **curve**

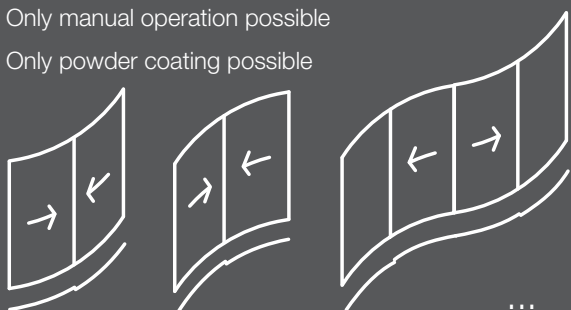

Keller minimal windows® **curve** creates flowing contours and fine transitions without having to do without the desired transparency. The curved minimal windows® sliding elements offer maximum flexibility in the implementation of

architectural ideas, even with large dimensions. The curved glazing is smooth running and easy to move. The requirements for thermal and sun protection can be combined perfectly with minimal windows® **curve**

TECHNICAL CHARACTERISTICS

- Min. radius: > 4000 mm for sliding leaves
> 1500 mm for fixed leaves
- Maximum leaf height: 4500 mm
- Max. leaf width: dependent on radius
- Maximum sliding leaf weight:
500 kg for double glazing
1000 kg for triple glazing
- Only manual operation possible
- Only powder coating possible

THE ADVANTAGES

- Timeless, reduced design - visually delicate
- Flexible integration in both minimal windows® series
- Large, curved fixed and sliding leaves
- Transition without threshold
- Different surface designs
- Drainage integrated in the system
- Modular system structure
- High flexibility and user comfort
