

STEALTH

ENGINEERED INVISIBLE

Premium Glass Guardrail System

New Product

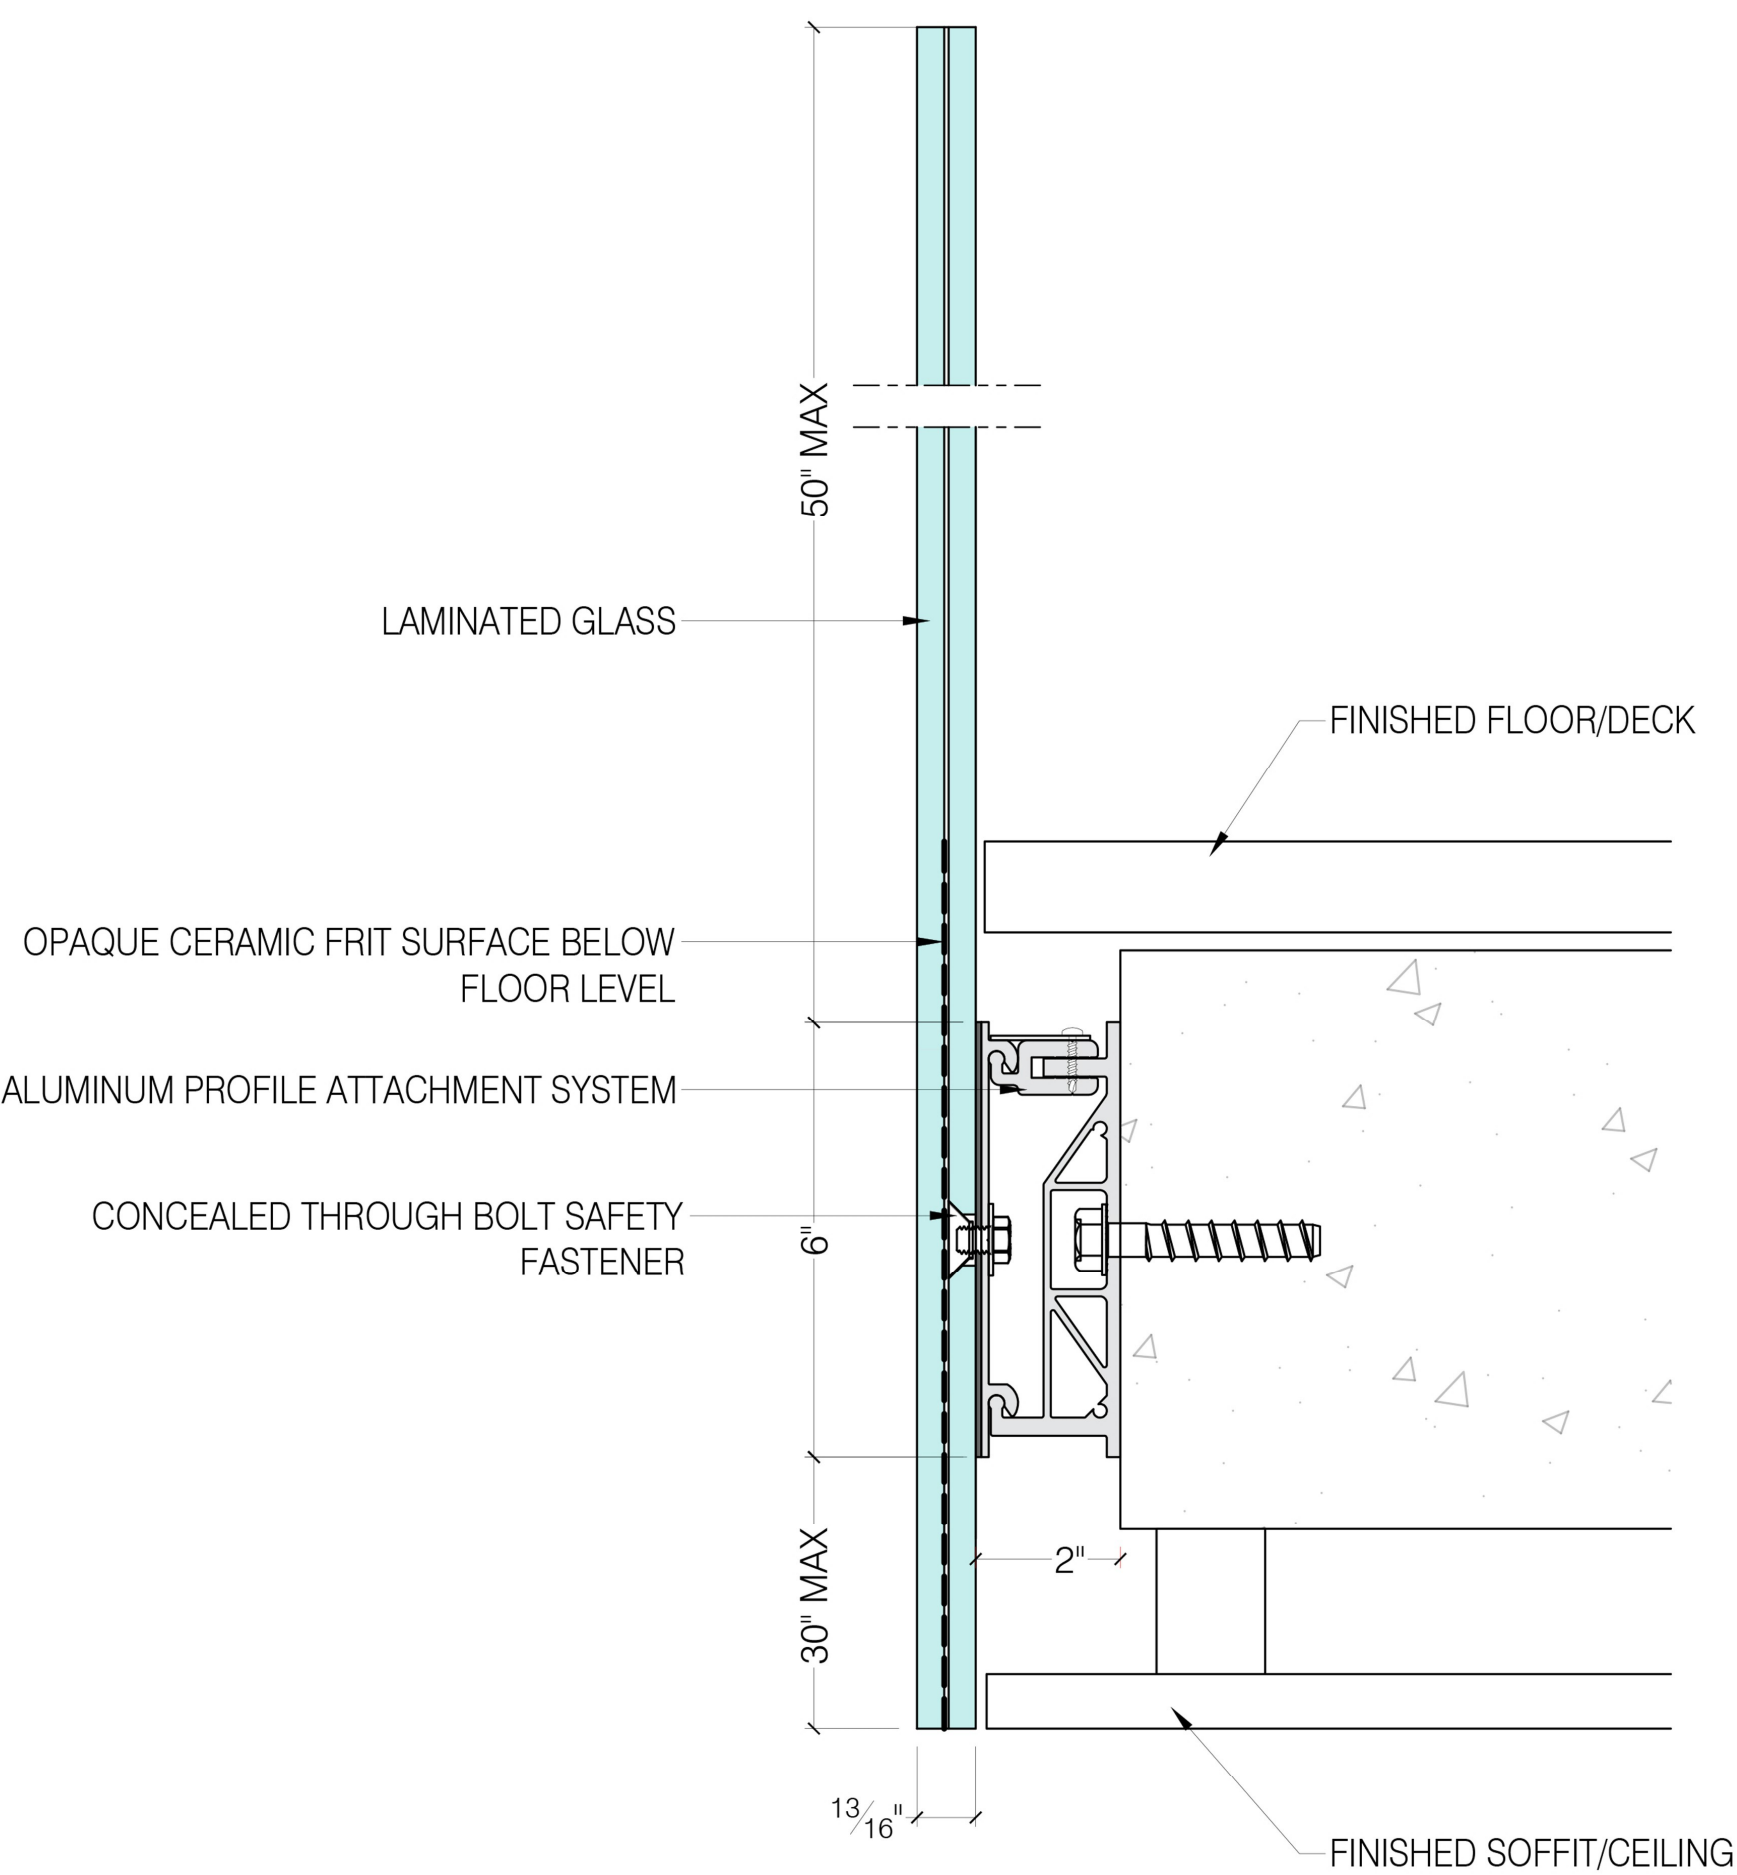

STEALTH

Engineered to be Invisible

Stealth redefines the language of glass guardrail systems through absolute visual minimalism. This system eliminates all visible hardware, no bolts, no caps, no channels, no distractions. The lower portion of the glass is colored to integrate with the building design, concealing all structural elements, while the exposed upper section remains crystal clear, delivering uninterrupted views. With customizable color options to match any architectural palette, Stealth transforms safety into a refined design statement.

System Features

- Fully concealed mounting system—no visible hardware
- Colored base for seamless architectural integration—glass guardrail system provides fascia finish
- Custom color matching for facade harmony
- Engineered for structural performance and durability
- Clean, frameless glass appearance
- Ideal for high-end residential and commercial projects
- Wide range of design flexibility
